

## EECS101: HOMEWORK #3 SOLUTION

### Written Problem

N	$I_j$	$\mu$	$\sigma^2$	T/F
1	8	8	0	T
2	8,8	8	0	T
3	8,8,9	8.33	0.22	T
4	8,8,9,10	8.75	0.6875	T
5	8,8,9,10,8	8.6	0.64	T
6	8,8,9,10,8,9	8.667	0.56	T
7	8,8,9,10,8,9,8	8.57	0.53	T
8	8,8,9,10,8,9,8,10	8.75	0.688	T
9	8,8,9,10,8,9,8,10,10	8.89	0.765	T
10	8,8,9,10,8,9,8,10,10,10	9	0.8	T
11	8,8,9,10,8,9,8,10,10,10,11	9.18	1.057	F

The effective area will be the first 10 values.

### Computer Problem

1. image1

a) Display

b) Histogram

c) Threshold = 139

$$d) A = \sum_i \sum_j b_{i,j} = 39605$$

$$\bar{x} = \frac{\sum_i \sum_j j b_{i,j}}{\sum_i \sum_j b_{i,j}} = 186$$

$$\bar{y} = \frac{\sum_i \sum_j i b_{i,j}}{\sum_i \sum_j b_{i,j}} = 218 \quad (\text{origin: upper left corner of the image})$$

Object center (origin: bottom left corner of the image), positive x is to the right:  $(x_0, y_0) = (186, 294)$

$(294, 186)$  is acceptable if it is specified that positive y is to the right.

e) Binary image

The gray point indicates the center.

2. image2  
a) Display

- b) Histogram

- c) Threshold = 164  
d)  $A = 65843$   
 $\bar{x} = 173$   
 $\bar{y} = 243$  (origin: upper left corner of the image)  
Object center (origin: bottom left corner of the image):  $(x_0, y_0) = (173, 269)$   
(269, 173) is acceptable if it is specified that positive y is to the right  
e) Binary image

The gray point indicates the center.

3. image3

a) Display

b) Histogram

c) Threshold = 48

d)  $A = 129498$

$\bar{x} = 292$

$\bar{y} = 238$  (origin: upper left corner of the image)

Object center (origin: bottom left corner of the image):  $(x_0, y_0) = (292, 274)$

$(274, 292)$  is acceptable if it is specified that positive y is to the right.

e) Binary image

The gray point indicates the center.
